

Project Proposal

Prepared by Mateme | IoT & Embedded Systems Developer

1. Project Summary

This proposal outlines a tailored technology solution based on your specific needs. As a specialist in IoT and embedded systems, I will deliver a smart, scalable, and reliable system.

2. Scope of Work

- Requirement analysis and consultation
- Design and development of embedded firmware
- Integration of sensors/actuators and cloud/dashboard
- Testing, deployment, and documentation

3. Timeline & Deliverables

Project will be executed over a period of 3-4 weeks as follows:

Week 1: Requirements & Planning

Week 2: Development & Integration

Week 3: Testing & Optimization

Week 4: Deployment & Training (optional)

4. Pricing

- Development: 250,000 RWF (approx. \$200)
- Dashboard & UI: 100,000 RWF (approx. \$80)
- Optional Support/Training: 50,000 RWF (\$40)

Total: 400,000 RWF (approx. \$320)

5. Signature
